Wi-Fi Setup Guide

BlueLink))
smart connect

Model 7205
Universal Programmable
Smart Wi-Fi Thermostat

**Leave this Setup Guide
with thermostat.**

7205-105-01

1   *Wire and Install Thermostat*

- Properly wire and configure thermostat. Refer to the Installer Guide.

- Refer to the User Manual for programming and maintenance.

NOTE: Wi-Fi works without common (C) wire on most systems; requires common on Heat Pump, Heat Only or Cool Only Systems

Helpful videos can be found at www.bluelinksmartconnect.com/wifi.

2   *Set-Up for Connection*

Before beginning setup you will need to:
- Know your Wi-Fi network name and password
- Have a valid e-mail address
- Get the FREE app

Apple® Devices:
Download the BlueLink Smart Connect® application from the **Apple® App Store**

Android™ Devices:
Download the BlueLink Smart Connect® application from the **Google Play Store**

Desktop Computer:
Go to **www.bluelinksmartconnect.com** and create an account.

NOTE: For Registration, your desktop PC must have a wireless connection.
3   *Login and Register*

3.1 Open the BlueLink Smart Connect App. Select **REGISTER** and enter a valid e-mail address.

3.2 Enter the thermostat serial number. You can locate this number on the back of the thermostat or on the enclosed thermostat registration card.

*NOTE: If you removed the thermostat to locate the serial number, make sure to reconnect it before selecting **ENTER**.*

3.3 Complete the remaining registration screens. Once you reach the Create Account screen, select **REGISTER**.

4   *Enter Network Information*

4.1 Enter your network name (SSID) and password, select **ENTER**.

NOTE: The network name and password are case sensitive fields.

**The application will now instruct you to put the thermostat into Wi-Fi connect mode.**

5 Enable Wi-Fi on Thermostat

5.1   On the thermostat, press and hold the **HOLD** and **RETURN** buttons for 3 seconds.

HOLD   +   RETURN

**5.2**   The display will alternate the words WIFI and SCAN and the ⏦ symbol will flash.

WIFI ↔ SCAN

NOTE: If you are already connected to a Wi-Fi network, you will see the network name (SSID) displayed 4 characters at a time with a solid ⏦ symbol. If needed, clear Wi-Fi settings and return to step 5.1 (See Changing Your Wi-Fi Settings).

*If you are not connected to 24 VAC, the thermostat will display POWR NO (No Power).*

POWR NO

6 Connect to Thermostat

6.1   The application will prompt you to go to your smartphone, tablet or computer Wi-Fi settings and select the **bluelink_wifi** network. See samples shown.

*NOTE: Do not exit the application. Minimize it so that you can return to the same screen after selecting the **bluelink_wifi** network. This is usually done by pressing the home button on your smart phone or tablet.*
Android™ Sample   Apple® Sample

7 Complete Setup

7.1   After selecting the **bluelink_wifi** network, use the home key to return to the application and select OK.

7.2   The word WAIT will appear in the thermostat display.

7.3   Once a connection is made, **Connection Successful** will appear in the application screen. At thermostat, your network name followed by the MAC address will appear.

**7.4**   At thermostat, press **RETURN** to exit Wi-Fi setup mode.

NOTE: After setup is complete, make sure to return your phone or tablet to the original wireless network.

Changing Your Wi-Fi Settings

First Clear Your Thermostat Wi-Fi Settings
1. Press and hold the **RETURN** button for 4 seconds.
2. The display will change showing the first User Option.
3. Press **RETURN** until you see the word WIFI in the display.
4. Press the **∧** button until WIFI CL appears.
5. Press **RETURN** to exit and clear all Wi-Fi settings.

WIFI CL

Then Update Your App Settings
1. Open the app and select **Update Account**.
2. Enter your account password.
3. Select **Wi-Fi Settings**.
4. Select the thermostat you wish to change.
5. Choose **WI-FI Network** or **WI-FI Password** and select Enter.
6. Update the information and select **Enter**.

NOTE: To complete setup, follow the instructions in the app and refer to sections 5 - 7.

Record Network Information for Future Reference

Network Name (SSID) _____

Network Password _____

Thermostat Serial Number # _____

You may need this information later or if calling for support.
